MATERIAL SAFETY DATA SHEET

Identification
Product Name: QUESTAR™ Polyester Film
Chemical Name: Polyethylene terephthalate
Chemical Family: Polyester
CAS number: 25038-59-9
Department of Transportation information: not regulated as a hazardous material.

Physical-Chemical Data
Melting range: 255-260°C
Specific Gravity (Water=1): 1.4
Decomposition temp: 300°C
Appearance and odor: Clear film, odorless

Low levels of acetaldehyde are present in the film which could be released on heating at elevated temperatures for long time periods.

Hazardous Ingredients
None as defined under the OSHA hazard communication standard, 29CFR1910.1200 or S.A.R.A. Title III, Section 313. This material is considered an article under OSHA and TSCA standards.

Fire and Explosion Hazard Data
Flammability: The film will burn if exposed to flame.
Extinguishing media: Carbon dioxide, water spray, foam or dry chemical.
Special fire-fighting procedures:
Wear self-contained breathing apparatus and complete personal protective equipment when potential for exposure to products of combustion exists.

Spill or Leak Procedures
Waste disposal method: QUESTAR™ polyester film is a non-hazardous solid waste material and is not regulated by the Resource Conservation Recovery Act. Dispose of or incinerate in accordance with local regulations.

Hazardous decomposition products: Emits acetaldehyde, carbon dioxide and carbon monoxide under fire conditions. The exact composition of decomposition products will depend on the conditions of combustion.

Special Protection Information
Protective clothing: None required under normal conditions of use.

Special Precautions
Precautions to be taken in handling: Unwinding, winding, and passage of polyethylene terephthalate film through and over rollers will tend to generate a strong electrostatic charge on the web. Static discharge devices should be properly positioned at such points to eliminate the charge and to prevent uncontrolled discharge from the web. This is particularly required in potentially explosive atmospheres and to protect personnel from the effects of a static discharge. Certain antistat grades are available.

To the best of our knowledge, the information contained herein is accurate. However, neither Filmquest, nor any of its subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards which exist.
