MATERIAL SAFETY DATA SHEET

1. Product and Company Identification

**Material Name**  NICKEL-CHROMIUM ALLOYS

**MSDS Number**  1154

**Chemical Formula**  Mixture

**Product use**  Aerospace and industrial gas turbine applications

**Synonym(s)**  226V, Alloy Y, AlResist 319, AM1, AM3, B1900, B1900+Hf, B1910, B1914, C101, C103, C103SC, C130, C242, C262, C263, C1023, Ch22 LZR, CHS88U, CHS104, DS 1000, G39, GTD111, GTD222, GTD241, GTD444, GTD741 + HA 236, Hastelloy C, Hastelloy X, How C, How W, How X, IN™ 100, IN™ 600, IN™ 625, IN™ 706, IN™ 713, IN™ 713C, IN™ 713LC, IN™ 718, IN™ 718 VPSD, IN™ 722, IN™ 738, IN™ 750X, IN™ 792, IN™ 792 Hf 0.5 + IN™ 792 Hf 1, IN™ 792 Mod 5A, IN™ 901, IN™ 939, IN™ 939HAL, IN™ 6203, IN™ W, IN™ X, Inconel™ 706, Inconel™ 718, KH85, MA 6000C, MA 754, Mar-M™ 002, Mar-M™ 004, Mar-M™ 200, Mar-M™ 200 + 2% Hf * Mar-M™ 246, Mar-M™ 247, Mar-M™ 247LC, Mar-M™ 421, Merl 76, MGA1400, MGA2400, MK4®, MK4HC®, Monolyoy 454, NiCr, Nim90, Nimonic™ 75, Nimonic™ 80, Nimonic™ 90, NX 188, PD21, PE10, PT999, PWA 1475 * Rene™ 41, Rene™ 77, Rene™ 80, Rene™ 80H, Rene™ 88, Rene™ 120, Rene™ 125, Rene™ 142, Rene™ 150, Rene™ 220, Rene™ N-2, Rene™ N-4, Rene™ N-4+, Rene™ N-5, Rene™ N-6, Rene™ N-500, Rene™ N-515 * Rinsealoy, SC180, SC 1000, SC 2000, SCRY3, SCRY4, Sel 1, Sel 15, Siemet®, Turbo 25, U-500, U-700, Waspaloy and other nickel-chromium alloys * * * IN™, Inconel™ and Nimonic™ are registered trademarks of Inco. * Mar-M™ is a registered trademark of Martin Marietta. * Rene™ is a registered trademark of GE Corporation.

2. Hazards Identification

**Emergency overview**

Solid. Metallic. Odorless. Non-combustible as supplied. Dust and fines from processing may be ignitable.

Explosion/fire hazards may be present when (See Sections 5, 7 and 10 for additional information):

- Heavily concentrated dust clouds are dispersed in the air.
- Molten metal is in contact with water/moisture.

Dust and fumes from processing: Can cause irritation of the eyes, skin and respiratory tract.

**Potential health effects**

The following statements summarize the health effects generally expected in cases of overexposures. User specific situations should be assessed by a qualified individual. Additional health information can be found in Section 11.

The health effects listed below are not likely to occur unless processing of this product generates dusts or fumes.

**Eyes**

Dust and fumes from processing: Can cause irritation.

**Skin**

Dust and fumes from processing: Can cause irritation. Prolonged or repeated skin contact may cause sensitization and allergic contact dermatitis.
Inhalation

Health effects from mechanical processing (e.g., cutting, grinding): Dust: Can cause irritation of the upper respiratory tract. Chronic overexposures: Can cause respiratory sensitization, asthma, scarring of the lungs (pulmonary fibrosis), damage to the heart muscle (cardiomyopathy) and deformities of the joints.

Additional health effects from elevated temperature processing (e.g., welding, melting): Dust and fumes from processing: Can cause irritation of the respiratory tract. Acute overexposures: Can cause metal fume fever (nausea, chills, fever, shortness of breath and malaise). Chronic overexposures: Can cause the accumulation of fluid in the lungs (pulmonary edema), benign lung disease (siderosis) and lung cancer.

Carcinogenicity and Reproductive Hazard

Product as shipped: Does not present any cancer or reproductive hazards.
Dust from mechanical processing: Can present a cancer hazard (Nickel, Cobalt). Can present a reproductive hazard for males (Manganese).
Dust and fumes from welding or elevated temperature processing: Can present a cancer hazard (Nickel compounds, Cobalt compounds, Hexavalent chromium compounds, Titanium dioxide, Welding fumes). Can present a reproductive hazard for males (Manganese compounds).

Medical conditions aggravated by exposure to product

Dust and fumes from processing: Asthma, chronic lung disease, Secondary Parkinson's disease and skin rashes.

3. Composition / Information on Ingredients

Composition comments

Complete composition is provided below and may include some components classified as non-hazardous.

Components | CAS # | Percent
--- | --- | ---
Nickel | 7440-02-0 | 40 - 82
Iron | 7439-89-6 | 0 - 37
Chromium | 7440-47-3 | 4 - 25
Cobalt | 7440-48-4 | 0 - 24
Molybdenum | 7439-98-7 | 0 - 24
Tungsten | 7440-33-7 | 0 - 15
Tantalum | 7440-25-7 | 0 - 12
Aluminum | 7429-90-5 | 0 - 11
Niobium | 7440-03-1 | 0 - 7
Rhenium | 7440-15-5 | 0 - 6
Titanium | 7440-32-6 | 0 - 6
Hafnium | 7440-58-6 | 0 - 2
Vanadium | 7440-62-2 | 0 - 2
Manganese | 7439-96-5 | 0 - 1

Additional Information

Additional compounds which may be formed during processing are listed in Section 8.

4. First Aid Measures

First aid procedures

Eye contact

Dust and fumes from processing: Rinse eyes with plenty of water or saline for at least 15 minutes. Consult a physician.

Skin contact

Dust and fumes from processing: Wash with soap and water for at least 15 minutes. Get medical attention if irritation develops or persists.

Inhalation

Dust and fumes from processing: Remove to fresh air. Check for clear airway, breathing, and presence of pulse. Provide cardiopulmonary resuscitation for persons without pulse or respirations. Consult a physician.
5. Fire Fighting Measures

Flammable/Combustible Properties
This product does not present fire or explosion hazards as shipped. Dust and fines from processing may be ignitable.

Fire / Explosion Hazards
May be a potential hazard under the following conditions:
- Heavily concentrated dust clouds are dispersed in the air. Dust or fines dispersed in the air can be explosive if subjected to a strong ignition source.
- Molten metal in contact with water/moisture. Moisture entrapped by molten metal can be explosive.

Extinguishing media
Suitable extinguishing media
Use Class D extinguishing agents, fluxing salts or dry sand on fires involving dusts or fines. Otherwise, use fire fighting methods and materials that are appropriate for surrounding fire.

Unsuitable extinguishing media
DO NOT USE water in fighting fires around molten metal.

Protection of firefighters
Fire fighters should wear NIOSH approved, positive pressure, self-contained breathing apparatus and full protective clothing when appropriate.

6. Accidental Release Measures

Spill or leak procedure
Avoid generating dust. Collect scrap for recycling. Pick up mechanically.

7. Handling and Storage

Handling
Avoid generating dust. Avoid contact with sharp edges or heated metal. Do not eat, drink, apply cosmetics, or smoke when handling or using.

Storage
Keep material dry.

Requirements for Remelting of Scrap Material or Ingot
Molten metal and water can be an explosive combination. The risk is greatest when there is sufficient molten metal to entrap or seal off the water. Water and other forms of contamination on or contained in scrap or remelt ingot are known to have caused explosions in melting operations.

During melting operations, the following minimum guidelines should be observed:
- Inspect all materials prior to furnace charging and completely remove surface contamination such as water, ice, snow, deposits of grease and oil or other surface contamination resulting from weather exposure, shipment, or storage.
- Store materials in dry, heated areas with any cracks or cavities pointed downwards.

8. Exposure Controls / Personal Protection

Engineering controls
Dust and fumes from processing: Use with adequate ventilation to meet the limits listed in Section 8.

### Personal protective equipment

- **Eye / face protection**: Wear safety glasses with side shields.
- **Skin protection**: Wear appropriate gloves to avoid any skin injury.
- **Respiratory protection**: Dust and fumes from processing: Use NIOSH-approved respiratory protection as specified by an Industrial Hygienist or other qualified professional if concentrations exceed the limits listed in Section 8. Suggested respiratory protection: N95.

### General

Personnel who handle and work with molten metal should utilize primary protective clothing like polycarbonate face shields, fire resistant tapper’s jackets, neck shades (snoods), leggings, spats and similar equipment to prevent burn injuries. In addition to primary protection, secondary or day-to-day work clothing that is fire resistant and sheds metal splash is recommended for use with molten metal. Synthetic materials should never be worn even as secondary clothing (undergarments).

### 9. Physical & Chemical Properties

- **Form**: Solid.
- **Appearance**: Metallic.
- **Boiling point**: Not determined
- **Melting point**: 2652.8 °F (1456 °C) (Nickel)
- **Flash point**: Not applicable
- **Auto-ignition temperature**: Not applicable
- **Flammability limits in air, lower, % by volume**: Not applicable
- **Flammability limits in air, upper, % by volume**: Not applicable
- **Vapor pressure**: Not applicable
- **Vapor density**: Not applicable
- **Solubility (water)**: Insoluble
- **Density**: 8.8 g/cm³ (0.318 lb/in³)
- **pH**: Not applicable
- **Odor**: Odorless.
- **Partition coefficient (n-octanol/water)**: Not applicable

### 10. Chemical Stability & Reactivity Information

- **Chemical stability**: Stable under normal conditions of use, storage, and transportation.
- **Conditions to avoid**: Molten metal can react violently/explosively with water or moisture, particularly when the water is entrapped.
  - In powder form: This product may react with strong oxidizing agents.
Hazardous polymerization  Will not occur.

11. Toxicological Information

Health effects associated with ingredients

Nickel dust and fume: Can cause irritation of eyes, skin and respiratory tract. Eye contact: Can cause inflammation of the eyes and eyelids (conjunctivitis). Skin contact: Can cause sensitization and allergic contact dermatitis. Chronic overexposures: Can cause perforation of the nasal septum, inflammation of the nasal passages (sinusitis), respiratory sensitization, asthma and scarring of the lungs (pulmonary fibrosis). Nickel alloys IARC/NTP: Reviewed and not recommended for listing by NTP. Listed as possibly carcinogenic to humans by IARC (Group 2B).

Chromium dust and fumes: Can cause irritation of eye, skin and respiratory tract. Metallic chromium and trivalent chromium: Not classifiable as to their carcinogenicity to humans by IARC.

Cobalt: Can cause irritation of eyes, skin and respiratory tract. Skin contact: Can cause allergic reactions. Acute and chronic overexposures: Can cause respiratory sensitization, asthma, scarring of the lungs (pulmonary fibrosis) and damage to the heart muscle (cardiomyopathy). Listed as possibly carcinogenic to humans by IARC (Group 2B).

Molybdenum dust and fumes: Can cause irritation of mucous membranes, skin and respiratory tract. Acute overexposures: Can cause headache, backache and sore joints. Chronic overexposures: Can cause deformities of the joints, blood disorders, kidney damage, lung damage and liver damage.

Tungsten dust: Can cause irritation of eyes, skin and upper respiratory tract.

Tantalum and tantalum oxide: Can cause mechanical irritation of eyes, skin and upper respiratory tract. Generally of low toxicity.

Aluminum dust/fines and fumes: Low health risk by inhalation. Generally considered to be biologically inert (milling, cutting, grinding).

Niobium dust and fumes: Acute overexposures: Generally of low toxicity. Chronic overexposures: Can cause lung damage.

Titanium dioxide: Can cause irritation of eyes and respiratory tract. Chronic overexposures: Can cause chronic bronchitis. IARC/NTP: Listed as possibly carcinogenic to humans by IARC (Group 2B).

Manganese dust or fumes: Chronic overexposures: Can cause inflammation of the lung tissues, scarring of the lungs (pulmonary fibrosis), central nervous system damage, Secondary Parkinson's Disease and reproductive harm in males.

Health effects associated with compounds formed during processing

Nickel compounds: Associated with lung cancer, cancer of the vocal cords and nasal cancer. IARC/NTP: Listed as "known to be a human carcinogen" by the NTP. Listed as carcinogenic to humans by IARC (Group 1).

Iron oxide: Chronic overexposures: Can cause benign lung disease (siderosis). Ingestion: Can cause irritation of gastrointestinal tract, bleeding, changes in the pH of the body fluids (metabolic acidosis) and liver damage.

Hexavalent chromium compounds (Chromium VI): Can cause irritation of eye, skin and respiratory tract. Skin contact: Can cause irritant dermatitis, allergic reactions and skin ulcers. Chronic overexposures: Can cause perforation of the nasal septum, respiratory sensitization, asthma, the accumulation of fluid in the lungs (pulmonary edema), lung damage, kidney damage, lung cancer, nasal cancer and cancer of the gastrointestinal tract. IARC/NTP: Listed as "known to be a human carcinogen" by the NTP. Listed as carcinogenic to humans by IARC (Group 1).

Chromium (III) compounds: Can cause irritation of eye, skin and respiratory tract. IARC/NTP: Not classifiable as to their carcinogenicity to humans by IARC.

Molybdenum trioxide: Can cause irritation of eyes, mucous membranes and upper respiratory tract. Chronic overexposures: Can cause reduction in the number of red blood cells (anemia), predisposition to gout, thyroid function changes, liver damage and lung damage. Additional information: Studies with experimental animals by inhalation have found lung cancer.
Alumina (aluminum oxide): Low health risk by inhalation. Generally considered to be biologically inert.

Titanium dioxide: Can cause irritation of eyes and respiratory tract. Chronic overexposures: Can cause chronic bronchitis. IARC/NTP: Listed as possibly carcinogenic to humans by IARC (Group 2B).

Vanadium pentoxide: Can cause irritation of eyes, skin and respiratory tract. Skin contact (prolonged or repeated): Can cause sensitization and dermatitis. Acute overexposures: Can cause inflammation of the eyes and eyelids (conjunctivitis), bronchitis and fluid in the lungs (pulmonary edema). Effects can be delayed up to 3 days. Chronic overexposures: Can cause kidney damage, blindness, asthma and emphysema. IARC/NTP: Listed as possibly carcinogenic to humans by IARC (Group 2B).

Manganese oxide fumes: Can cause irritation of the eyes, skin, and respiratory tract. Acute overexposures: Can cause metal fume fever (nausea, fever, chills, shortness of breath and malaise).

Compounds Formed During Processing

NTP (National Toxicology Program) - Report on Carcinogens - Known Human Carcinogens
Chromium (VI) compounds (18540-29-9) Known Human Carcinogen
Nickel compounds, insoluble (CASNo. Not available) Known Human Carcinogen
U.S. - OSHA - Specifically Regulated Carcinogens (1910.1001 to 1910.1096)
Chromium (VI) compounds (18540-29-9) Workers exposed to Cr(VI) are at an increased risk of developing lung cancer - see 29 CFR 1910.1026

12. Ecological Information

Ecotoxicity

Components

Ecotoxicity - Freshwater Algae Data
Nickel (7440-02-0) 72 Hr EC50 Pseudokirchneriella subcapitata: 0.18 mg/L; 96 Hr EC50 Pseudokirchneriella subcapitata: 0.174 - 0.311 mg/L [static]

Ecotoxicity - Freshwater Fish Species Data
Cobalt (7440-48-4) 96 Hr LC50 Brachydanio rerio: >100 mg/L [static]
Iron (7439-89-6) 96 Hr LC50 Morone saxatilis: 13.6 mg/L [static]; 96 Hr LC50 Cyprinus carpio: 0.56 mg/L [semi-static]
Nickel (7440-02-0) 96 Hr LC50 Brachydanio rerio: >100 mg/L; 96 Hr LC50 Cyprinus carpio: 1.3 mg/L [semi-static]; 96 Hr LC50 Cyprinus carpio: 10.4 mg/L [static]

Ecotoxicity - Water Flea Data
Nickel (7440-02-0) 48 Hr EC50 Daphnia magna: >100 mg/L; 48 Hr EC50 Daphnia magna: 1 mg/L [Static]

Compounds Formed During Processing

Ecotoxicity - Freshwater Fish Species Data
Chromium (VI) compounds (18540-29-9) 96 Hr LC50 Pimephales promelas: 36.2 mg/L; 96 Hr LC50 Oncorhynchus mykiss: 7.6 mg/L

Ecotoxicity - Water Flea Data
Chromium (VI) compounds (18540-29-9) 24 Hr EC50 water flea: 435 µg/L

Environmental Fate

No data available for product.

13. Disposal Considerations

Disposal instructions
Reuse or recycle material whenever possible. If reuse or recycling is not possible, disposal must be made according to local or governmental regulations.

Waste codes
RCRA Status: Not federally regulated in the U.S. if disposed of "as is."
RCRA waste codes other than described here may apply depending on use of the product. Status must be determined at the point of waste generation. Refer to 40 CFR 261 or state equivalent in the U.S. TCLP testing is recommended for Chromium.

14. Transport Information

General Shipping Information

Basic shipping description:
- UN number
- Proper shipping name Not regulated
- Hazard class -
- Packing group -

General Shipping Notes
- When "Not regulated", enter the proper freight classification, MSDS Number and Product Name onto the shipping paperwork.

15. Regulatory Information

US federal regulations
In reference to Title VI of the Clean Air Act of 1990, this material does not contain nor was it manufactured using ozone-depleting chemicals.
Components

**U.S. - CERCLA/SARA - Hazardous Substances and their Reportable Quantities**

- **Chromium (7440-47-3)**: 5000 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is larger than 100 micrometers); 2270 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is larger than 100 micrometers)
- **Nickel (7440-02-0)**: 100 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is larger than 100 micrometers); 45.4 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is larger than 100 micrometers)

**U.S. - CERCLA/SARA - Section 313 - Emission Reporting**

- **Aluminum (7429-90-5)**: 1.0 % de minimis concentration (dust or fume only)
- **Chromium (7440-47-3)**: 1.0 % de minimis concentration
- **Cobalt (7440-48-4)**: 0.1 % de minimis concentration
- **Manganese (7439-96-5)**: 1.0 % de minimis concentration
- **Nickel (7440-02-0)**: 0.1 % de minimis concentration
- **Vanadium (7440-62-2)**: 1.0 % de minimis concentration (except when contained in an alloy)

State regulations

**Components**

**U.S. - California - 8 CCR Section 339 - Director's List of Hazardous Substances**

- **Aluminum (7429-90-5)**: Present
- **Chromium (7440-47-3)**: Present
- **Cobalt (7440-48-4)**: Present (exempt when encapsulated in a capsule which meets the definition of Special Form Materials prescribed in 49 CFR 173.403(z))
- **Hafnium (7440-58-6)**: Present
- **Iron (7439-89-6)**: Present
- **Manganese (7439-96-5)**: Present
- **Molybdenum (7439-98-7)**: Present
- **Nickel (7440-02-0)**: Present
- **Tantalum (7440-25-7)**: Present
- **Tungsten (7440-33-7)**: Present
- **Vanadium (7440-62-2)**: Present

**U.S. - California - Proposition 65 - Carcinogens List**

- **Cobalt (7440-48-4)**: carcinogen, initial date 7/1/92 (powder)
- **Nickel (7440-02-0)**: carcinogen, initial date 10/1/89

**U.S. - Massachusetts - Right To Know List**

- **Aluminum (7429-90-5)**: Present
- **Chromium (7440-47-3)**: Carcinogen; Extraordinarily hazardous
- **Cobalt (7440-48-4)**: Present
- **Hafnium (7440-58-6)**: Present
- **Manganese (7439-96-5)**: Present
- **Molybdenum (7439-98-7)**: Present
- **Nickel (7440-02-0)**: Carcinogen; Extraordinarily hazardous
- **Tantalum (7440-25-7)**: Present
- **Tungsten (7440-33-7)**: Present
- **Vanadium (7440-62-2)**: Present (dust and fume)

**U.S. - Minnesota - Hazardous Substance List**

- **Aluminum (7429-90-5)**: Present (dust)
- **Chromium (7440-47-3)**: Present
- **Cobalt (7440-48-4)**: Present (dust and fume)
- **Hafnium (7440-58-6)**: Present
- **Manganese (7439-96-5)**: Present
- **Molybdenum (7439-98-7)**: Present
- **Nickel (7440-02-0)**: Carcinogen
- **Tantalum (7440-25-7)**: Present
- **Tungsten (7440-33-7)**: Present

**U.S. - New Jersey - Right to Know Hazardous Substance List**

- **Aluminum (7429-90-5)**: sn 0054
- **Chromium (7440-47-3)**: sn 0432
- **Cobalt (7440-48-4)**: sn 0520
- **Hafnium (7440-58-6)**: sn 0967
- **Manganese (7439-96-5)**: sn 1155 (dust and fume)

</table>

A "Yes" indicates that all components of this product comply with the inventory requirements administered by the governing country(s).

#### Inventory information

Japan - ENCS Inventory: Pure metals are not specifically listed by CAS or ENCS number. The class of compounds for each of these metals is listed on the ENCS inventory.

#### 16. Other Information

**MSDS History**

- Origination date: August 17, 2001
- Supersedes: June 4, 2008
- Revision date: March 11, 2010
March 11, 2010: New format.
June 4, 2008: Reviewed on a periodic basis in accordance with Alcoa policy. Change(s) in Section: 1, 2, 3, 4, 5, 8, 11, 12, 13, 14 and 15
October 12, 2004: Combined with Alcoa MSDS No. 1155. Change(s) in Section: 1, 2, 3, 8 and 15.
August 17, 2001: New MSDS: Covers some products formerly on Alcoa MSDS 1040 and Howmet MSDSs 101A, 102A, 106A and 122A.

Disclaimer
The information in the sheet was written based on the best knowledge and experience currently available.
CAUTION
Non-combustible as supplied. Dust and fines from processing may be ignitable.
Explosion/fire hazards may be present when:
Heavily concentrated dust clouds are dispersed in the air. Molten metal is in contact with water/moisture.
Dust and fumes from processing: Can cause irritation of the eyes, skin and respiratory tract.

Chronic overexposures: Can cause respiratory sensitization, asthma, scarring of the lungs, damage to the heart muscle and deformities of the joints.
Additional health effects from elevated temperature processing (e.g., welding, melting): Acute overexposures: Can cause metal fume fever. Chronic overexposures: Can cause the accumulation of fluid in the lungs, benign lung disease and lung cancer.

FIRST AID
Eye contact Dust and fumes from processing: Rinse eyes with plenty of water or saline for at least 15 minutes. Consult a physician.
Skin contact Dust and fumes from processing: Wash with soap and water for at least 15 minutes. Get medical attention if irritation develops or persists.
Inhalation Dust and fumes from processing: Remove to fresh air. Check for clear airway, breathing, and presence of pulse. Provide cardiopulmonary resuscitation for persons without pulse or respirations. Consult a physician.

FIRE FIGHTING
Suitable extinguishing media Use Class D extinguishing agents, fluxing salts or dry sand on fires involving dusts or fines. Otherwise, use fire fighting methods and materials that are appropriate for surrounding fire.
Extinguishing media which must not be used for safety reasons DO NOT USE water in fighting fires around molten metal.

SPILL PROCEDURES
Spill or leak procedure Avoid generating dust. Collect scrap for recycling. Pick up mechanically.

HANDLING AND STORAGE
Handling Avoid generating dust. Avoid contact with sharp edges or heated metal. Do not eat, drink, apply cosmetics, or smoke when handling or using.
Storage Keep material dry.
